- We offer a good value, affordable, specialised concrete driveway service across Sydney

New Driveways

Adding value to your home is easy with a new or refurbished concrete driveway. After all, street appeal is everything. Whether you choose a colour with an elegant cove finish, stamped pattern or other texture, we have the right option to best suit your home and budget.

Coloured Concrete Driveways

An elegant colour through concrete mix with a cove finish is the most popular and timeless option you can get for your driveway. It won't date and its easy to maintain.

Stamped Concrete Driveways

Stamped concrete gives your driveway that deeper textured pattern that is both classy and maintenance free. We've chosen the most popular patterns to show you here.

Sawcut Tile Concrete Driveway

We achieve a large format tiled grid look by cutting lines into your concrete a few days after its poured. The options with this are limitless.

Exposed Aggregate Concrete Driveways

This is a premium decorative look that is achieved with a process that results in the internal aggregate within the concrete being exposed highlighting the natural elements of the stone.

Spray On Concrete Surface Patterns

Once your concrete has cured, you can opt for a tough Polymer cement coating to create a fine coloured, textured or decorative pattern of your choice.

Concrete Sealing

We recommend applying penetrating concrete sealer once your driveway has cured. This will protect it from dirt, stains and other contaminants, making it easier to maintain for years to come.

Concrete Driveway Makeovers

Adding value to your home affordably

myDriveway provides a lower cost alternative to removal and reinstatement of a new driveway. We offer a range of spray on concrete resurfacing, epoxy floor coatings or tinted concrete re-sealing that will breath new life into your existing concrete driveway.

Concrete Resurfacing Spray On

This process involves patching and repairing cracks in your old driveway then spraying a tough Polymer cement coating to create a fine coloured, textured or decorative pattern of your choice.

Concrete Driveway Re-Sealing

Rejuvenate and bring back to life your existing concrete driveway with a wash and re-seal. Our 2 part sealer is a high performance coating that will give your tired old driveway the new look it needs.

Epoxy Floor Coating

An epoxy floor coating is a premium and hard wearing decorative coating applied in either Plain Coloured or a variety of stone looking textures. They are suitable for garage floors and other internal areas prone to harsh treatment.

a myDriveway makeover

Our Client Process

1

SELECTION

- Select a finish for your new driveway or driveway makeover and call myDriveway for a Free Fixed Price Quotation.

2

QUOTATION & DEPOSIT

- To book in your "Start Date" and "Completion Date", simply sign the quotation accompanied with a \$550 deposit.
- Proof of funds will need to be provided to myDriveways prior to construction.
- This might be a bank statement or letter of finance arrangement from your bank.

3

COUNCIL PERMIT

- Obtain a Driveway or Vehicular Crossing Permit from your local Council if we are conducting work in the Road Reserve.
- We will issue you our Insurance details for you to submit along with your form.
- Email us proof of payment of your application along with any specific Council design requirements and the phone number of the Driveway Inspections Team

4

PREPARATION & PAYMENT

- myDriveway will clear your old driveway if needed or begin patching work for your driveway makeover.
- You will need to pay a stage payment of 60% of the Quotation Value upon arrival of materials to site.
- Once payment is received, myDriveway will prepare the formwork and lay reinforcing steel for your new driveway

5

CONCRETE & PAYMENT

- myDriveway will schedule concrete delivery upon receipt of your 2nd stage payment.
- We will lay concrete and finish your driveway to your specifications.
- We will erect temporary barrier tape to alert others that fresh concrete has been laid to your new driveway.
- myDriveway will issue a final invoice prior to the concrete pour
- You will need to make your final payment on the day your slab is poured.

6

CARE FOR YOUR DRIVEWAY

- myDriveway recommend applying a penetrating sealer to your new concrete driveway and will offer it as an added service.
- Leave your barrier tape for a week after your new driveway has been poured
- We recommend you backfill along the edges of your driveway within a week to avoid any trip hazards and to further protect your new driveway
